

# WG4 activity - NECTAR survey 1

**SOFTWARE COMMONLY USED BY NECTAR COMMUNITY**

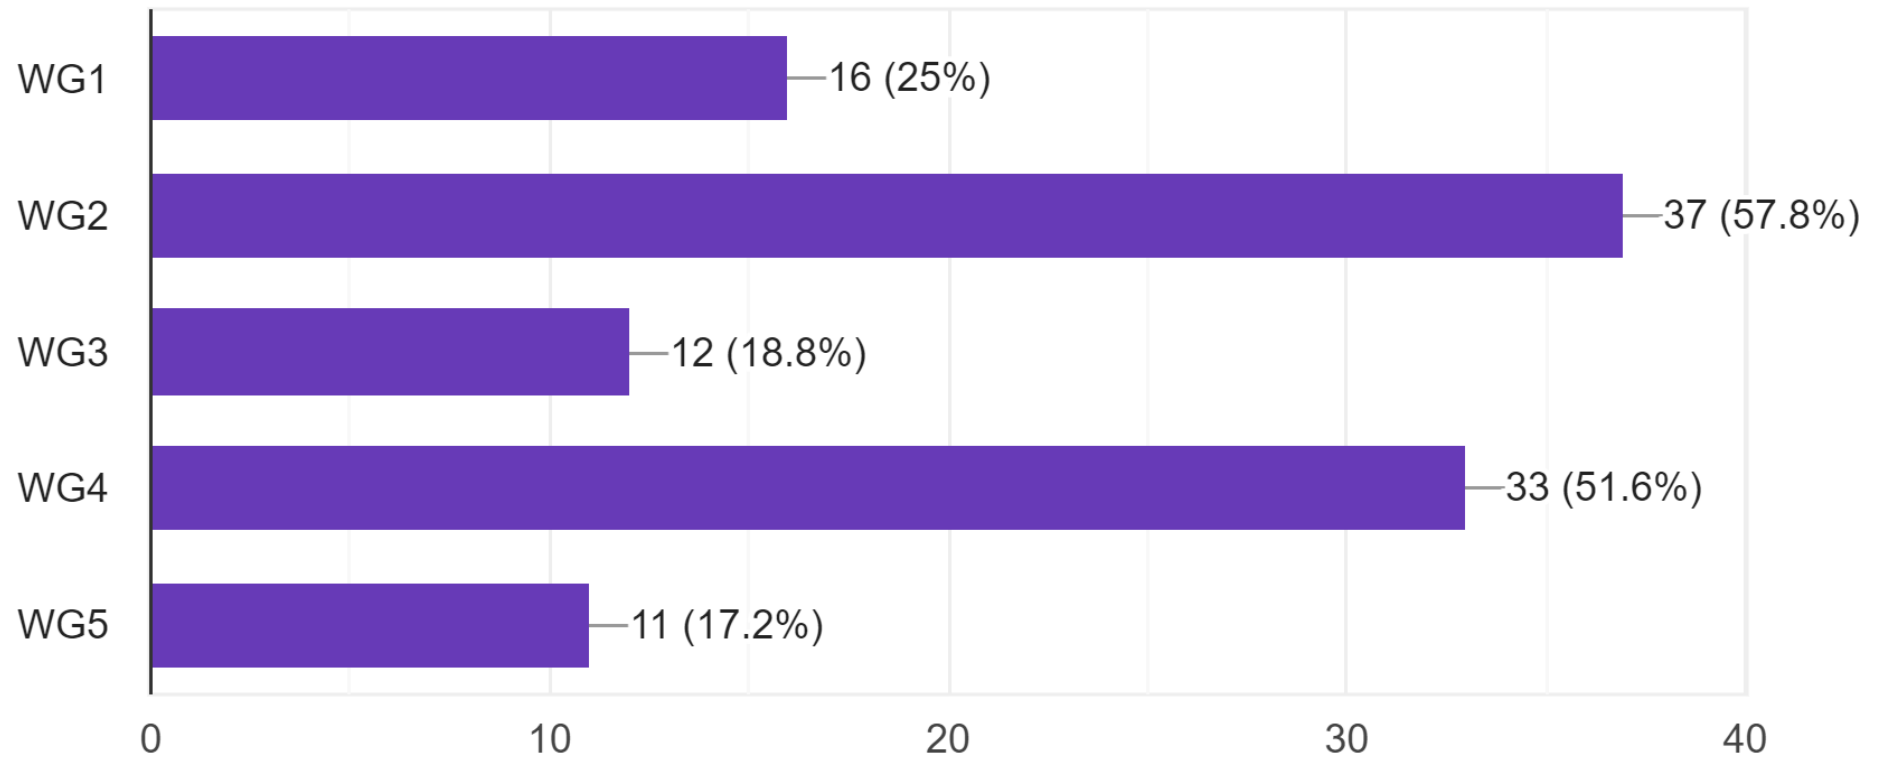

## Country

64 responses (until 09/03/2021)

## NECTAR WG

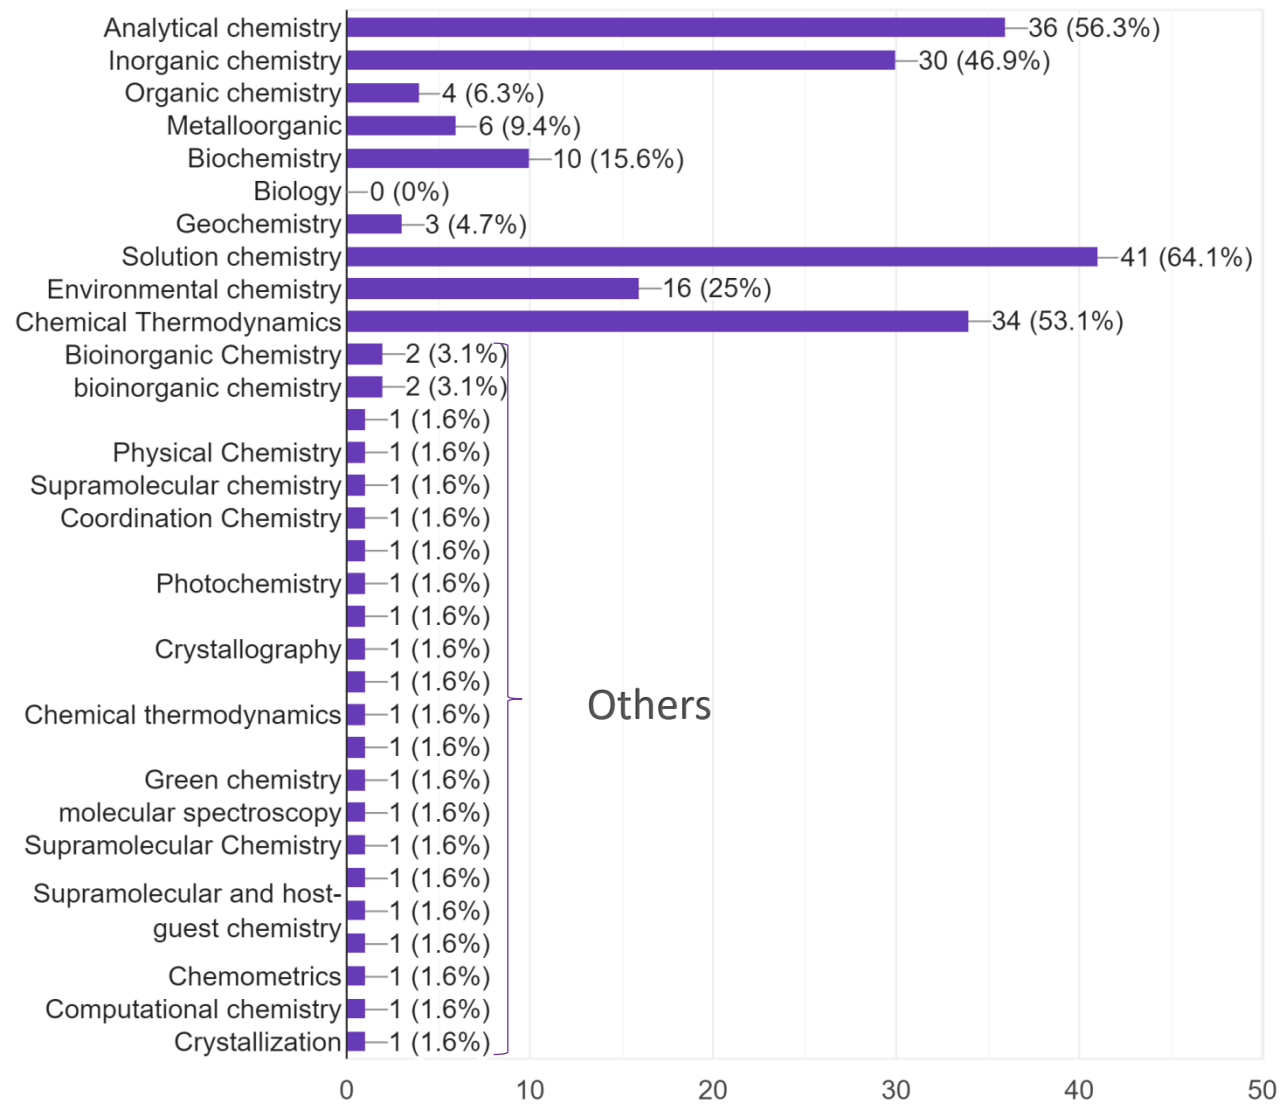

64 responses

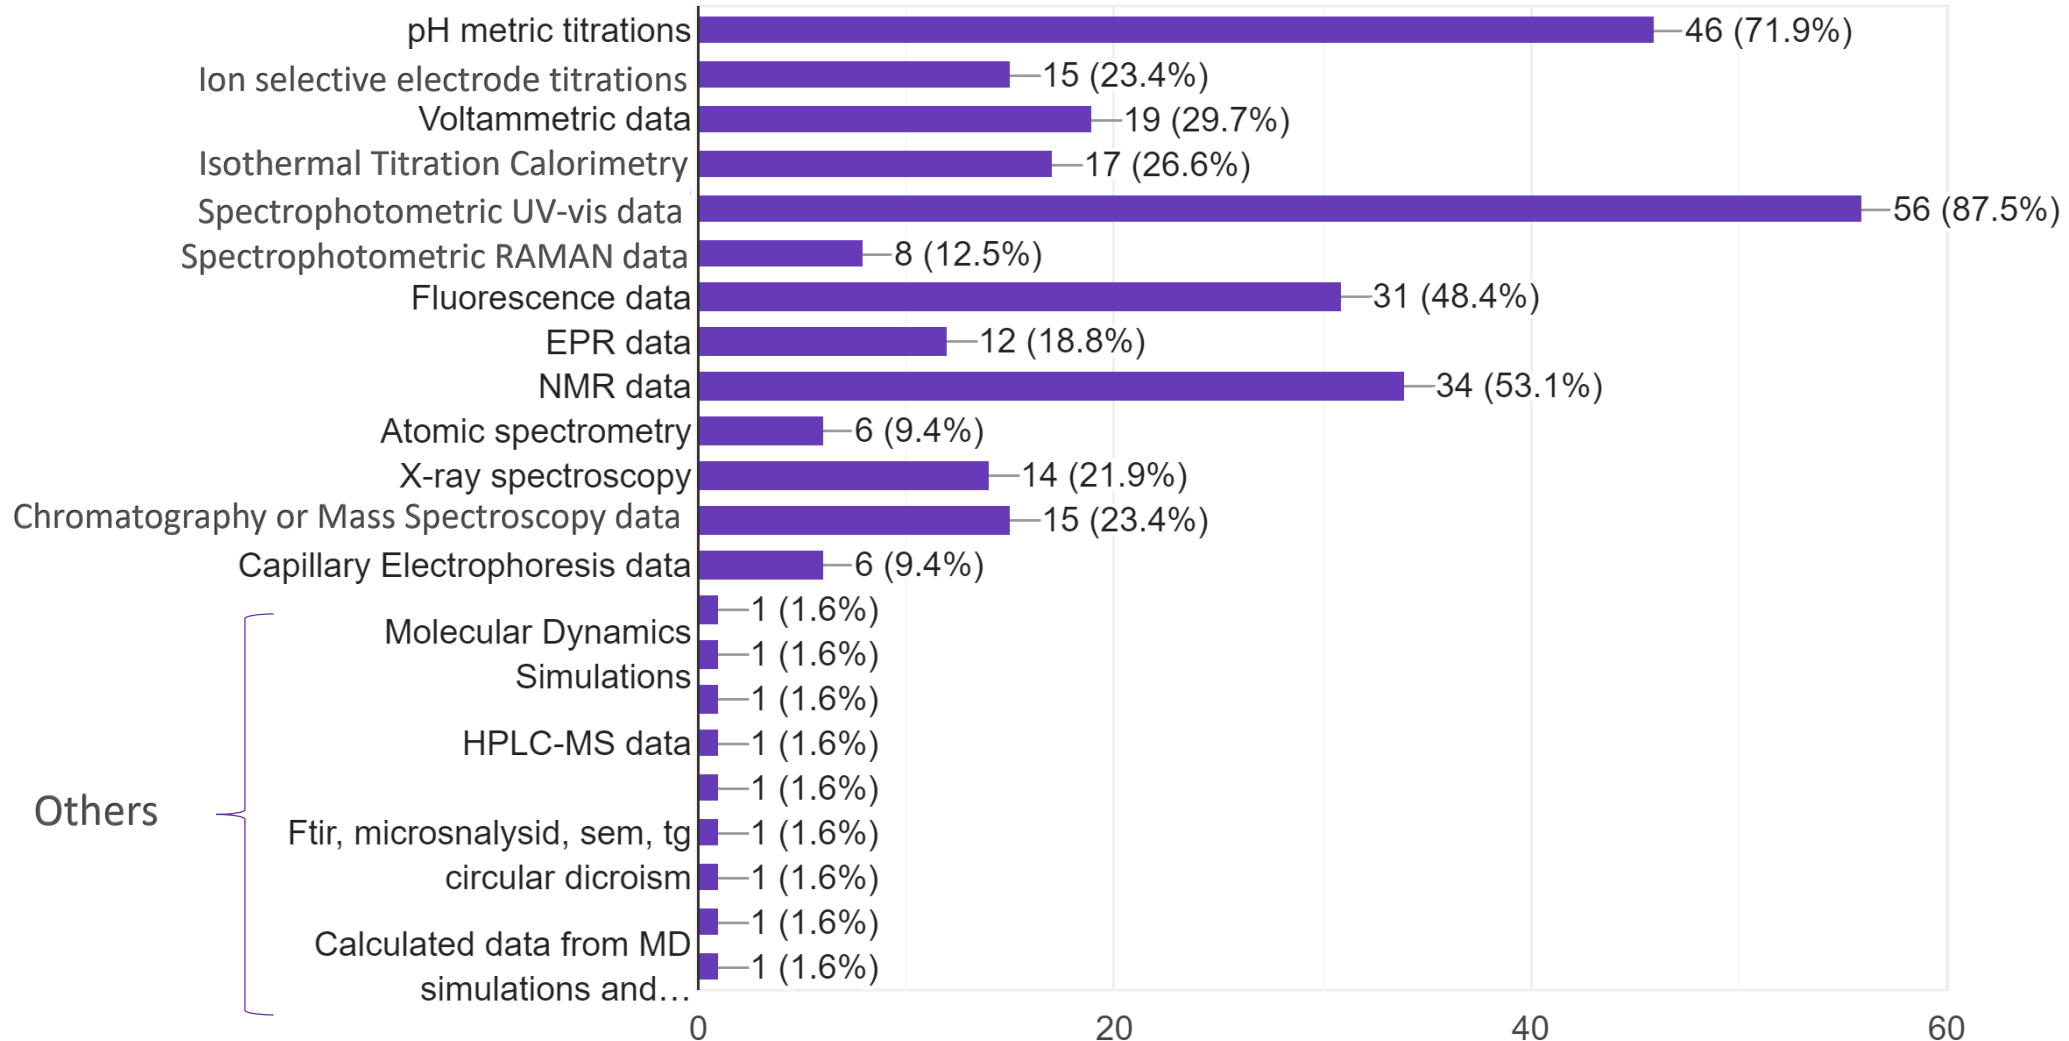

### Research fields of interest

64 responses

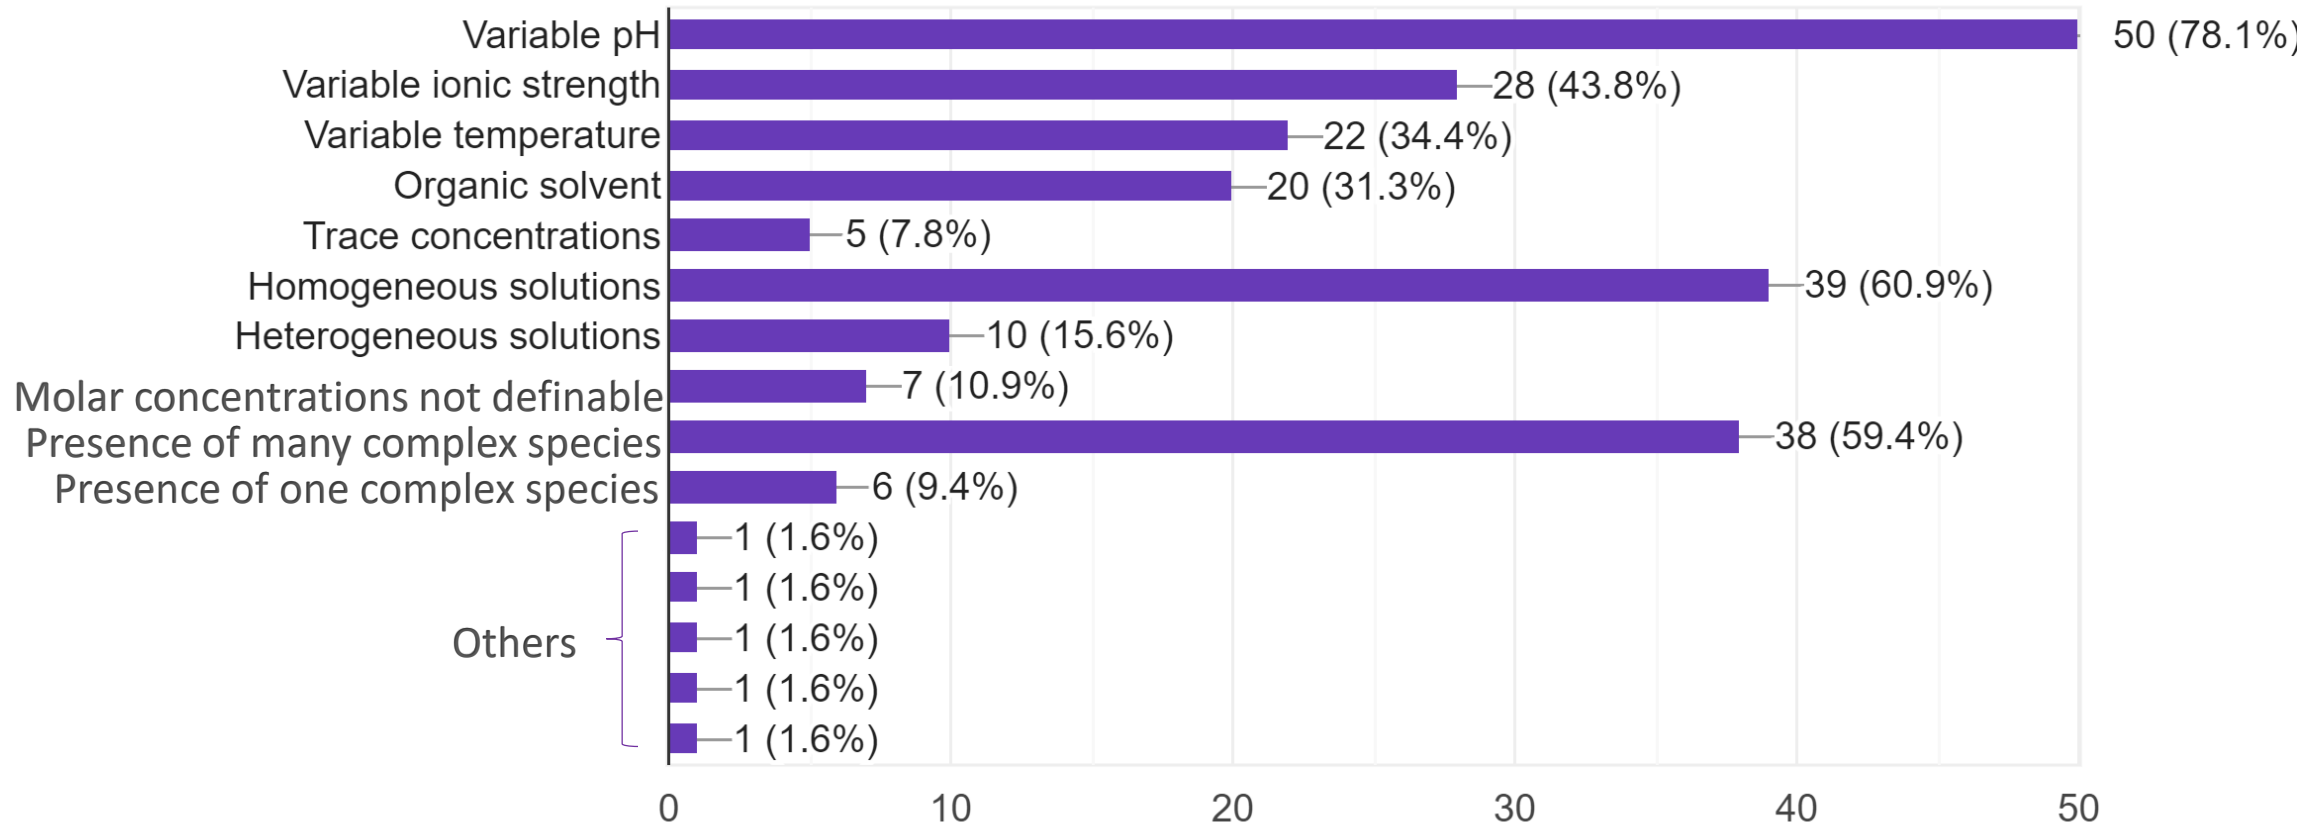

# What type of data do you handle for your research?

64 responses

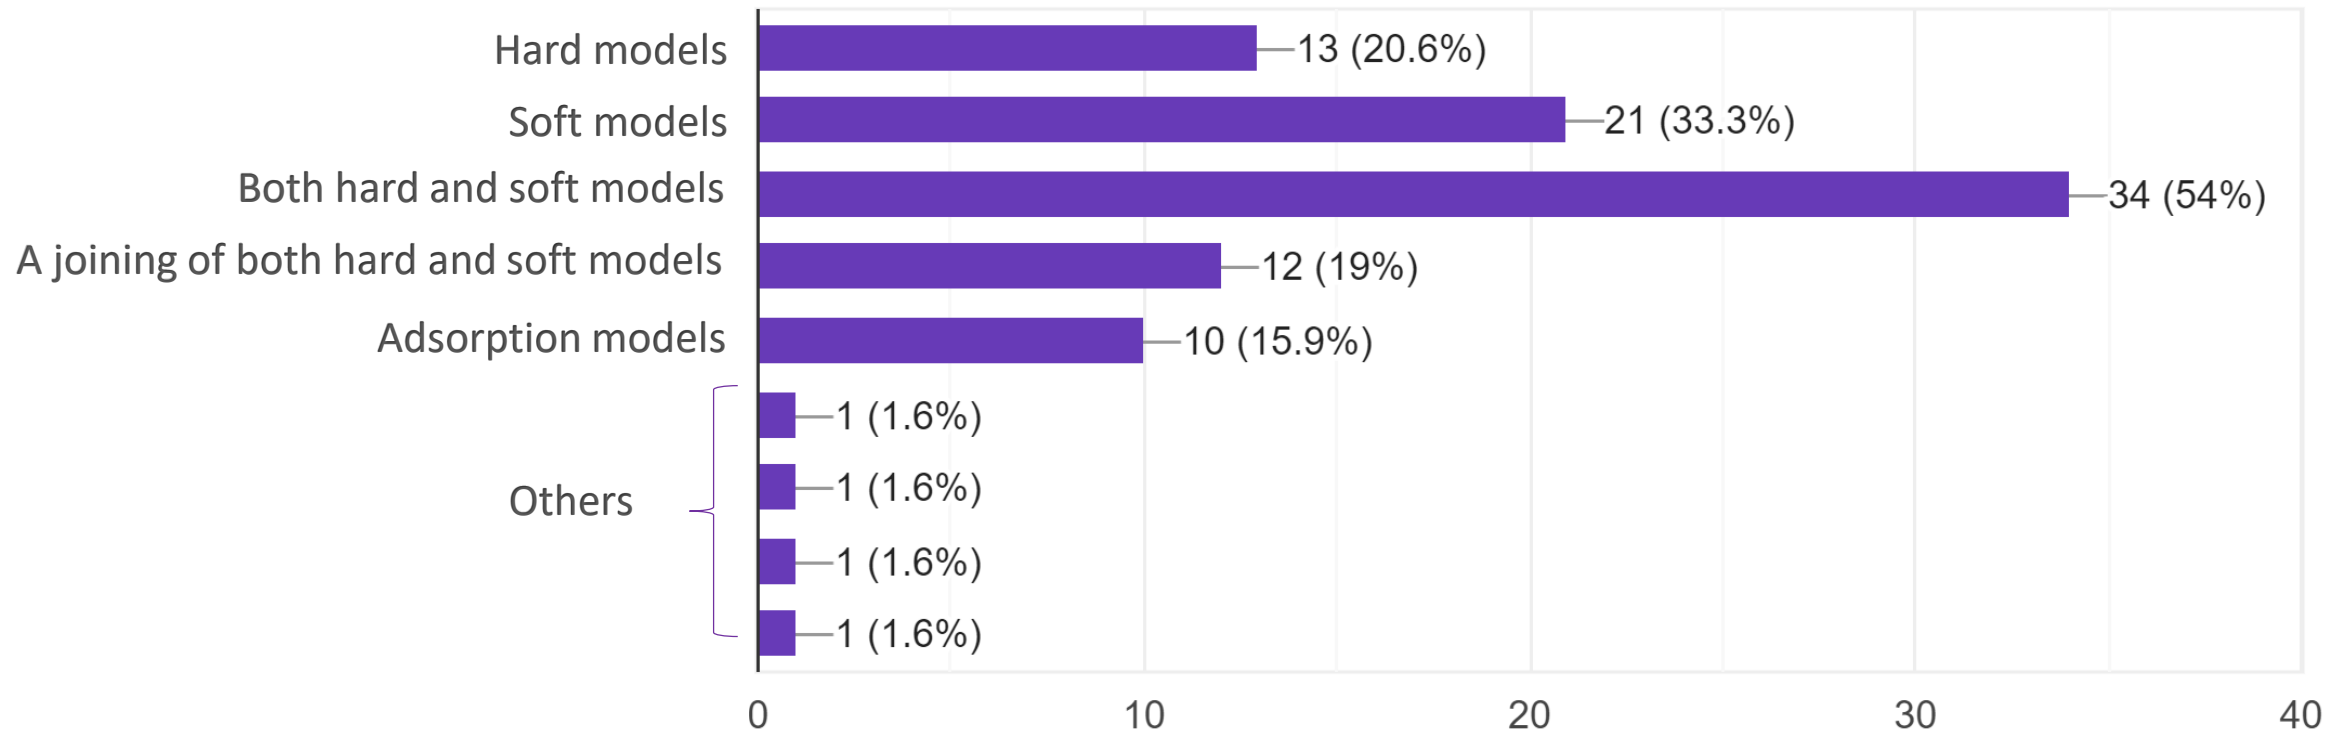

## Conditions for measurement of equilibrium constants

64 responses

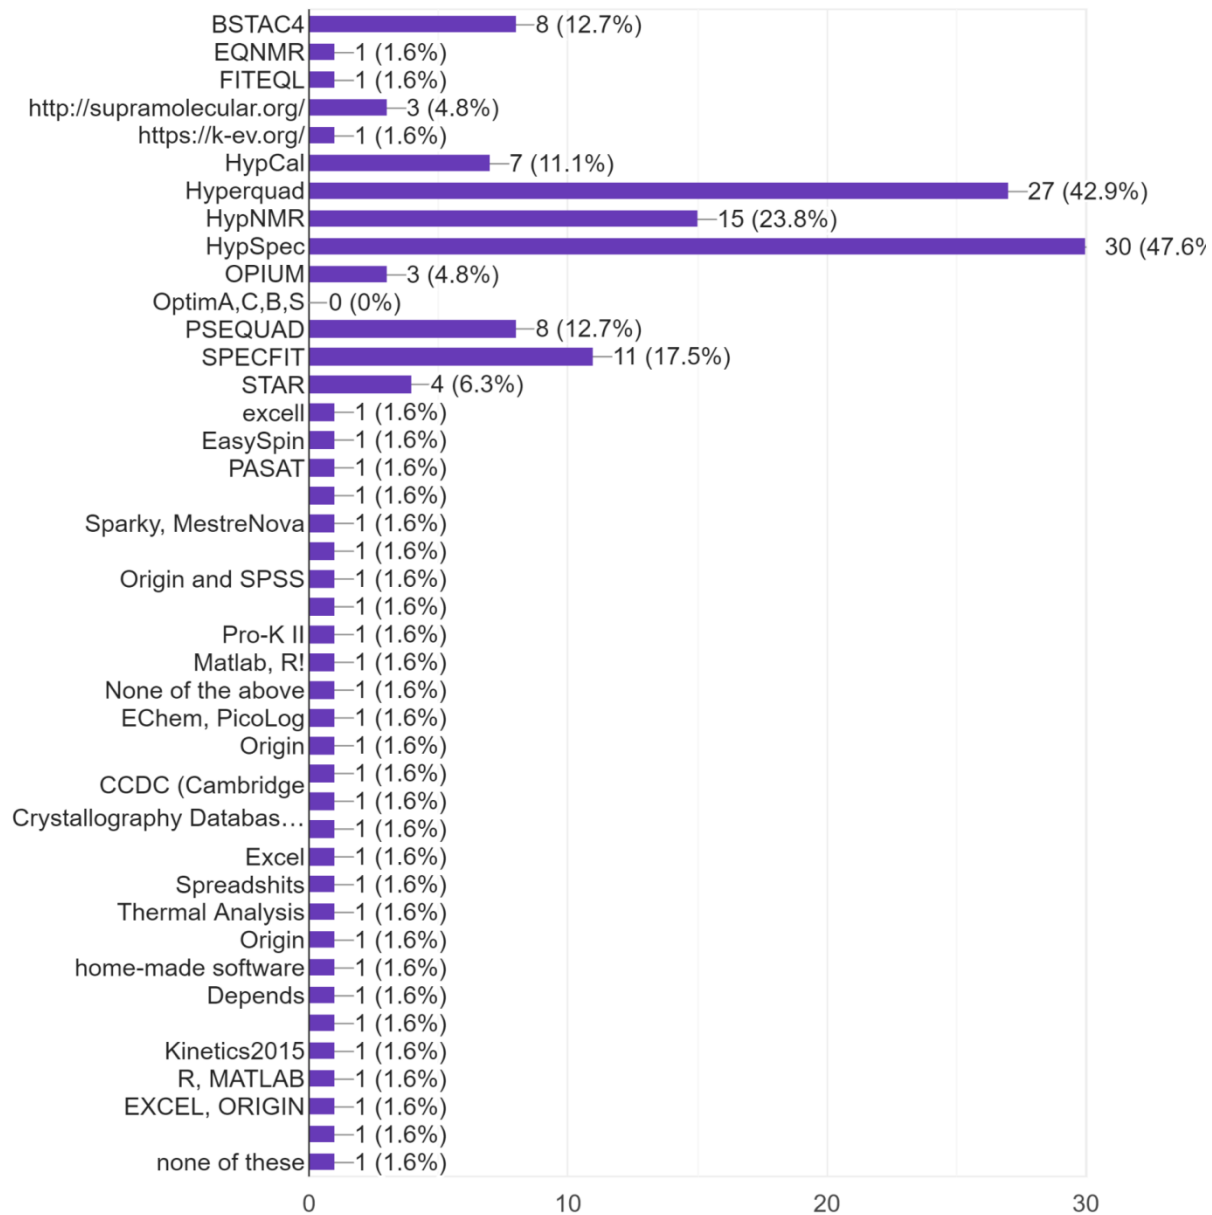

## What type of models do you use?

63 responses

## What software are you using for your research?

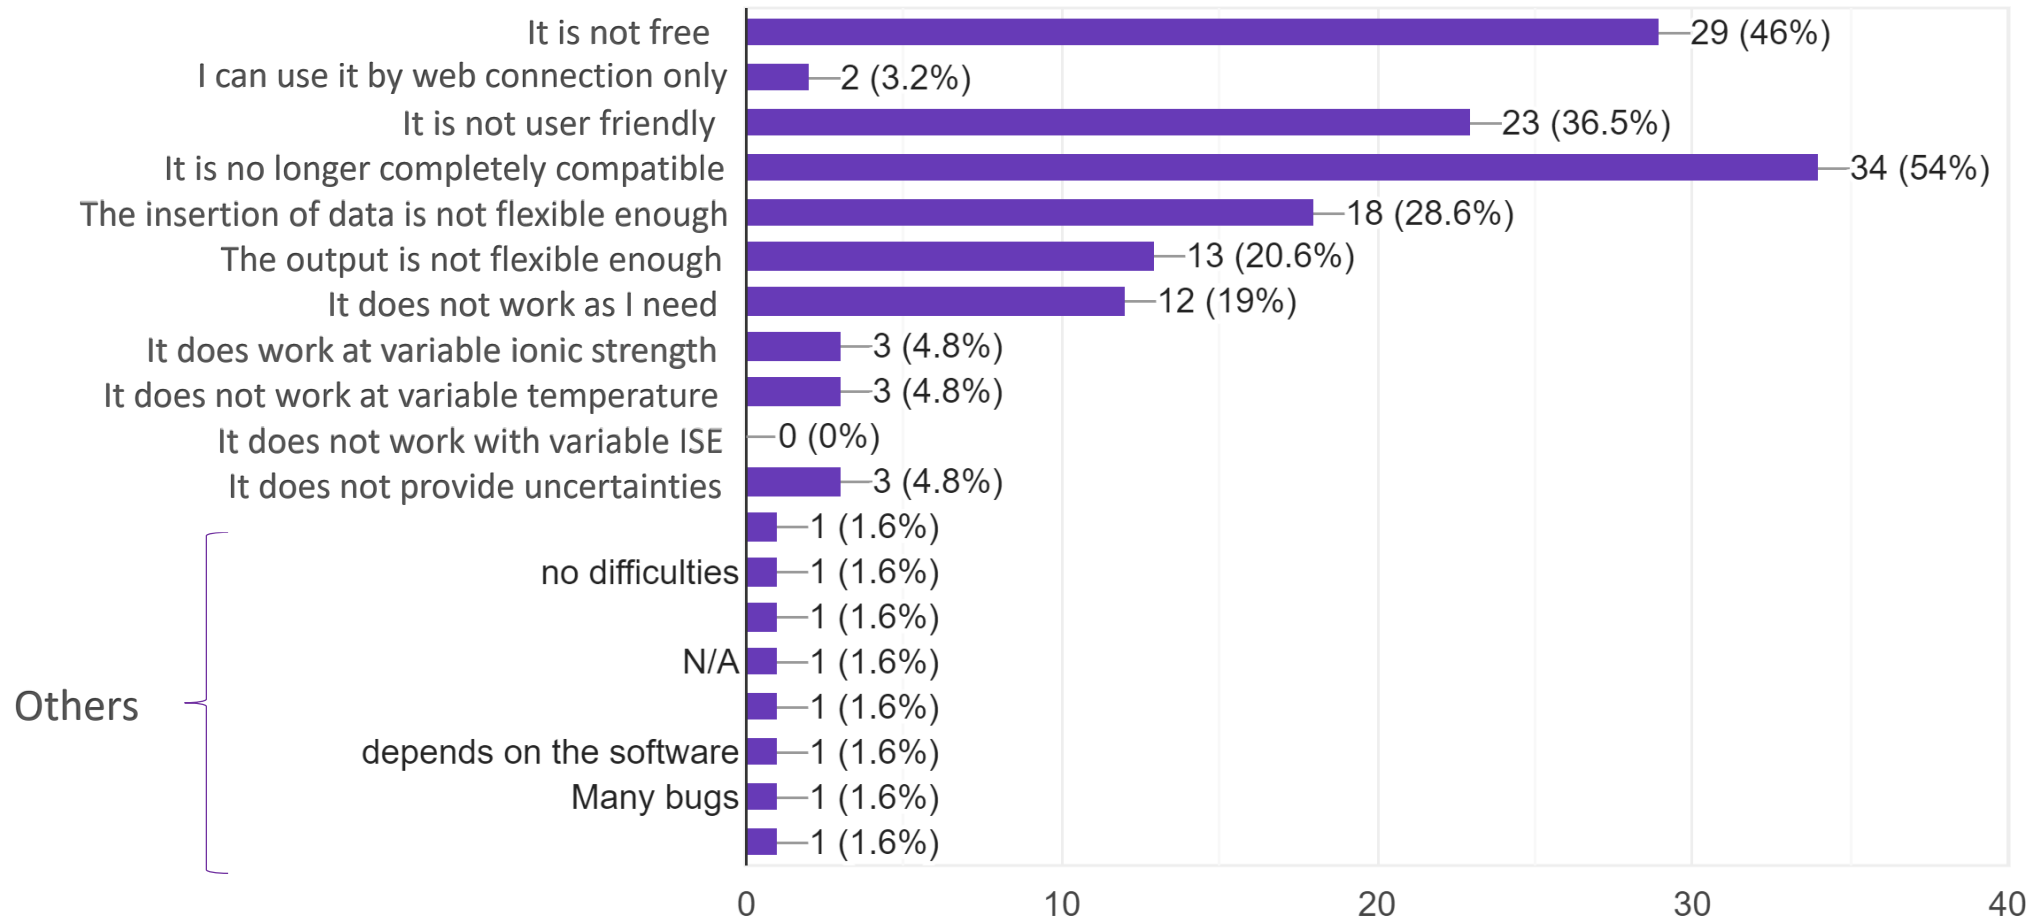

63 responses

## What difficulties do you encounter in using software?

63 responses

## Notes

- The problems of software update, compatibility with equipment and not being free are the most striking ones
- The survey highlights the need of a dissemination of guidelines/conditions/setup/advice for the accurate and reliable refinement of stability constant and parameter values to be employed by a broad audience of researchers in the field of solution equilibria and thermodynamics
