

Synthesis and characterization of poly-hydroxypyridinone (poly-HP) based compounds

Origin institution:

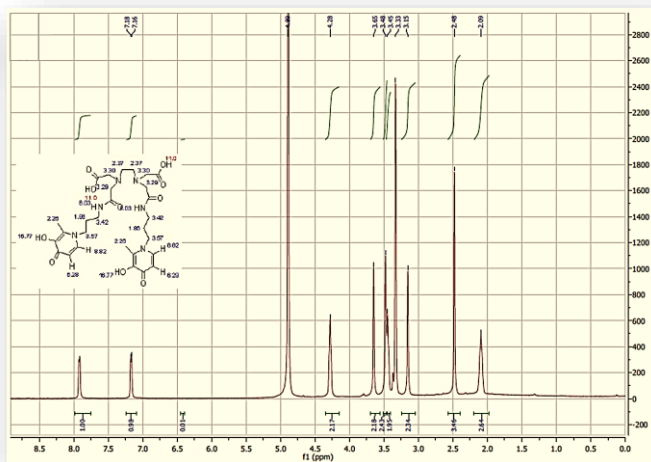

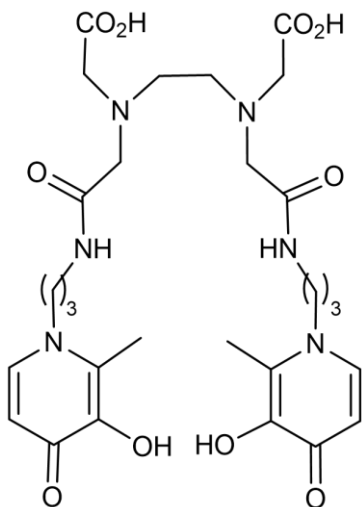

*Department of Life and Environmental Science,
University of Cagliari (Italy)*

Host institution:

*Instituto Superior Técnico,
University of Lisbon (Portugal)*

The aim of my STSM has been the synthesis and characterization of new bis-Hydroxypyridinone (Bis-HP). STSM allowed me to learn more about organic synthesis and the characterization of compounds. Thanks to this experience I was also able to meet new people and visit a new beautiful place like Lisbon.

CA18202-STSM 21/02/2023-21/03/2023
